

## Trochu Area Prospect Sheet

<p><b><u>Trochu Area: Farmout Information</u></b></p>	<ul style="list-style-type: none"> <li>• 1 sections available</li> </ul>
<p><b><u>Geology</u></b></p>	<p><b>MNVL CBM</b> – coals present 1475m – 1550m TVD. Tests or test data would be required to determine viability of CBM production from these coals.</p> <p><u>Primary</u>  <b>LDUC</b> – Oil production is located in areas of structural highs. Most wells in the area are only drilled to the BNFF if not drilled to the LDUC. Section 23 has no deep wells, which leaves the section open to potential from deep formations. In productive wellbores, the top of the LDUC is typically perforated and multiple zones of interest are visible in the well logs where the whole formation has been drilled through. Formation top 1830m – 1870m TVD  <b>NSKU</b> - Section 23 has no deep wells, which leaves the section open to potential from deep formations. Production is realized on a very strong protruding structural high one township north of section 23. Well log assessment in neighboring sections shows favorable gamma and resistivity values with low porosity values. Formation top 1630m – 1680m TVD.</p> <p><u>Secondary</u>  <b>WPGS</b> – Two wells one township away are producing oil. Well logs show many intervals of interest. Only 4 wells within a 1.5 township radius have been drilled to WPGS depth, making this formation open to exploratory evaluation.  <b>BNFF</b> - Section 23 has no deep wells, which leaves the section open to potential from deep formations. Production is sparse and appears to drop and level off quickly. Well logs show intervals of interest have low gamma ray with high resistivity and density values. Formation top 1350m-1400m TVD.</p>
<p><b><u>Seismic</u></b></p>	<p>A description of EnCana’s seismic is included on the plats attached to this package. Fore review of and/or access to the seismic, please contact the negotiator. Access to such information will be subject to EnCana’s Standard Confidentiality Agreement.</p>
<p><b><u>Farmout Terms</u></b></p>	<p>To be negotiated.</p>

## LAND PLAT & SCHEDULE

### Land Schedule

Lands	Type	Land Details	Expiry	WI%	Surface Land
T 34 R 20 W4M 23	Crown	PNG below base Mannville 256 ha	January 26, 2010	100	Not yet acquired

*\*All Lands exclude CBM.*

*This Information Memorandum does not constitute an offer or obligation by EnCana to exchange or farmout any of the Properties. EnCana, at its sole discretion, may declare a proposal accepted or rejected without ascribing any reason thereto.*
