

Asset Sale – Prairie Provident Resources – Southern Alberta – Coutts Field

Prairie Provident Resources (“PPR”) is working with **Energy Advisors Group** to monetize several non-core Central and Southern Alberta assets, starting their 2023 divestiture program with the PPR-operated Coutts Field, comprised of approximately 3,640 gross / 2,850 net acres. Most leases have rights to the base of the Mannville. Two wells, including a recent reactivation, produce steadily at 15 boe/d (net) from the Cutbank and Glauconitic Sands at depths ranging 2,600 to 4,100 feet (~800 to 1,250 m) TVD. Another low-cost reactivation opportunity has been identified and is scheduled for Q2/Q3 2023.

Long-life oil production and reactivation candidate
 ~\$40,000 November 2022 cash flow

- Coutts Field: Cutbank & Glauconitic Production
- 100% WI
- ~2,850 Net Acres (5.7 Sections)
- 2-Producers, 1-Low-Cost, Low-Risk Reactivation
- PDP NPV of \$1,307,700
- PDP Reserves of 31 Mbbl
